Professional Experience

Reekap Inc   *Remote*

FULL STACK DEVELOPER   *Feb. 2024 - Nov 2024*

- Built a React.js web app and browser extension for recording meetings.
- Engineered a backend system with Express.js and OpenAI APIs for transcription and summarization.
- Set up CI/CD pipelines with GitHub Actions for streamlined deployments.

Amaka Studio   *Remote*

FULL STACK DEVELOPER   *May. 2023 - Dec 2023*

- Played a key role in the development of the social media site Amaka Studio, contributing to both frontend and backend components built entirely from scratch.
- Developed the backend infrastructure of Amaka Studio using StrapiJS framework, PostgreSQL database, and HapiJS.
- Conducted comprehensive testing and debugging to ensure the reliability and performance of the platform, implemented Docker for containerized development and deployed the platform on AWS.

Perzsi   *Remote*

FULL STACK DEVELOPER   *Jan. 2022 - May 2023*

- Redesigned the frontend of an e-commerce platform for a better user experience.
- Built backend systems using Node.js, MySQL, and hosted on DigitalOcean.

Gtext Holdings
Onsite

FULL STACK DEVELOPER *May. 2021 - Jan. 2022*

- Created backend API endpoints for the Gvest mobile app deployed on both android and iOS store using Node.js.
- Developed the Gvest website using Next.js, enhancing user experience and responsiveness. The site is hosted at https://gvestglobal.com

Penni
Onsite

JUNIOR SOFTWARE ENGINEER *Apr. 2020 - Jan. 2021*

- Created a Chrome Extension using React.js and Webpack.
- Integrated Firebase Authentication and GraphQL to manage user data.

FlashTech
Remote

FRONTEND DEVELOPER INTERN *Feb. 2019 - Dec. 2019*

- Designed and developed E-commerce websites, optimizing for mobile devices.
- Translated designs into responsive user interfaces using React.js.

Major Projects

Amaka Studio: Social Media Platform for Creators
Developed Amaka Studio, a social media platform where creators can post articles, videos, and events. Users can subscribe to creators, engage with articles, and participate in online events. Integrated Flutterwave for payment processing and utilized Hapi.js and MongoDB for impression tracking.
Technologies: React.js, Strapi, PostgreSQL, Hapi.js, MongoDB, Flutterwave API
